We have a condemnation on the property for no water. All this means is you can't reside in the house without the water being on. Anyone can rehab the house and once water is back on the condemnation is lifted. If a new owner takes over and they have no intent of occupying the house we can lift the condemnation if it helps to get the work done. This is the only thing Code Enforcement currently has open on this property. We will work with any owner willing to restore the water supply.
